

## **Jubilee congress of the DGAO e.V.**

**5th Scientific Congress for Aligner Orthodontics 23rd and 24th November 2018, Cologne, Germany**

**Following the outstanding success in 2016, the German Association for Aligner Orthodontics e.V. (DGAO) is now holding its fifth Scientific Congress for Aligner Orthodontics. The topic in this year will be “Aligner therapy – current state and future visions”. This will take place on 23rd and 24th November 2018 in the Cologne Gürzenich.**

At the scientific conferences held every two years by the DGAO, orthodontic surgeons and dentists can familiarise themselves with and discuss the latest developments in aligner treatments. At these events, internationally renowned experts from practice and research report on all available aligner systems.

A comprehensive dental exhibition is also held alongside the congress. The DGAO congress is currently the largest event to offer a corresponding forum that is dedicated exclusively to aligner treatment and is independent of any manufacturer.
